MADE IN ITALY

Coating Guns

# PM SERIES

This range of professional guns has been developed by P.M.T. for extruding and spraying single component sealer products (MS-Polymer) contained in standard plastic and aluminium cartridges which are available on the market.

## ACCESSORIES UPON REQUEST

RF - Flow regulator 1/4 x 10/1

RP/M - Pressure regulator 1/4 x 1/4 gas F. with manometer 1/8 gas F.

N.B. RF can be supplied with the manometer assembled, RP/M can be supplied without manometer.

## GENERAL FEATURES

The multi-possibilities of product's adjustment and material's atomisation allows to the different models of this series to obtain surfaces with a strong or light orange peel effect and profiles of various widths and thicknesses, according to the specific requirements. The treated part can therefore be reproduced in its original form. Moreover the new pulverisation system allows that the sprayed profiles show no signs of defects and they are thoroughly clean. This avoids annoying waste of time due to protective surrounding spray's area.

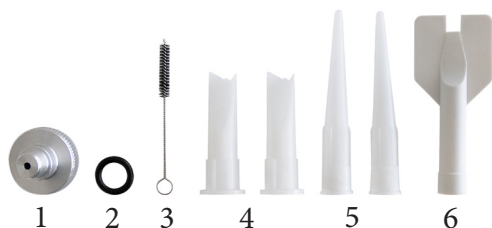

Thanks to the gun's hermetic lock, once the product has been opened, it may be left indoors for several weeks, allowing you to use the gun when needed and thus avoiding wasting material that has dried up during a working pause.

Maintenance is therefore less frequently required.

The spray cap already assembled onto the gun, it is coated with an anti-adherent material, which guarantees easy cleaning. Once the sealer has hardened, it can be removed very easily.

All the guns of this series are supplied with a NOZZLE EXTRUSION KIT, which makes it possible to make extruded profiles of various shapes simply by replacing the spray cap with the extrusion cap and by screwing the plastic nozzle. This KIT contains furthermore the pipe cleaner for cleaning parts difficult to reach and an o-ring as spare part.

## NOZZLES EXTRUSION KIT

1. Extrusion cap
4. Nr. 2 nozzles for flat shaped extrusion with a guide .
5. Nr. 2 nozzles for round extrusion.
6. Nr. 1 semi-round nozzle that can be cut in order to obtain various beads.
2. O-Ring 15x4
3. Pipe cleaner

Application	Extrusion and spray of sealer products, single - components (MS-Polymer)
Body	High quality drop- forged brass nickel plated.
Pressure	Working pressure 3-5 bar /Maximum pressure allowed 8 bar
Air Consumption	Approximate 200-300 l/min
Fitting	1/4 gas male
Noise level	<80 dBA
Nozzle	1,6 - 2,5 mm

# PM1 M

Professional gun for extruding and spraying single component sealing products contained in standard plastic cartridges with standard thread 15x2.5.

The front ring nut has a thread , thanks to which it is possible to screw the product's cartridge onto the it. The tube which contains the material and the rear nut is made up of one piece, so that it is easier to replace the cartridge. Furthermore the air's feeding tube for pushing the material is placed on the front ring, so in this way the air's feeding tube will not hinder the operation of substitution.

The gun is furthermore equipped of a piston for unlock the material integrated in the tube, thanks to which the piston inside the cartridge is unlocked in a mechanical way, in the moment that the tube is screwed on the gun's body. This allows that the cartridge's piston is unlocked in order to avoid rotation of the same ones and air's infiltrations inside the material.

## PM 1 M FEATURES

Application	Estrusion and spray of sealer products, single - components (MS-Polymer)
Cartridge	Plastic 310 ml.
Cartridge connection type	Threaded 15x2,5
Fitting	1/4 gas male
Pressure	Working pressure 3-5 bar /Maximum pressure allowed 8 bar
Gun's weight	1234 g
Single package	Neutral carton box 300x290x85 mm
Single package weight	260 g
Accessories supplied	Nozzles extrusion kit

# PM 2

*First born in the serie, the PM/2 is a professional gun for extruding and spraying single component sealing products contained in standard plastic and aluminium 310 ml cartridges .*

*The connection of the cartridge to the gun takes place by the push of the back ring nut on the cartridge.*

*Furthermote the air's feeding tube is placed on the back ring nut, this to avoid that the compressed air will get in touch with the product itself.*

## PM 2 FEATURES

Application	Estrusion and spray of sealer products, single - components (MS-Polymer).
Cartridge	Plastic and aluminium 310 ml .
Cartridge connection type	Pushed.
Fitting	1/4 gas male.
Pressure	Working pressure 3-5 bar /Maximum pressure allowed 8 bar.
Gun's weight	974 g
Single package	Neutral carton box 300x290x85 mm
Single package weight	260 g
Accessories supplied	Nozzles extrusion kit

*Latest born in the range, the PM/3 is a professional gun for extruding and spraying single component sealing products contained in standard plastic 310 ml cartridges .*

*Unlike the PM 1 - M , the connection of the cartridge to the gun takes palce by the push of teh integrated tube with the back cover onto the carridge, thanks to the product holder tube and to the front ring nut , which has not any thread inside. Furthermore the air's feeding tube for pushing the material is placed on the front ring, so in this way the air's feeding tube will not hinder the operation of substitution.*

*The gun is furthermore equipped of a piston for unlock the material integrated in the tube, thanks to which the piston inside the cartridge is unlocked ina mechanical way, in the moment that the tube is screwed on the gun's body. This allows that the cartridge's piston is unlocked in order to avoid rotation of the same ones and air's infiltrations inside the material.*

## PM 3 FEATURES

Application	Estrusion and spray of sealer products, single - components (MS-Polymer).
Cartridge	Plastic 310 ml .
Cartridge connection type	Pushed.
Fitting	1/4 gas male.
Pressure	Working pressure 3-5 bar /Maximum pressure allowed 8 bar.
Gun's weight	1225 g
Single package	Neutral carton box 300x290x85 mm
Single package weight	208 g
Accessories supplied	Nozzles extrusion kit

# BS 15 SERIES

The BS 15 range has been developed for applying and spraying of protective and soundproofing materials like gravel protection, anti-rust, vibration-damping, bituminous paints, bituminous and protective waxes both solvent-based and water-based of last generation.

## ACCESSORIES UPON REQUEST

RF - Flow regulator 1/4 x 10/1

RP/M - Pressure regulator 1/4 x 1/4 gas F. with manometer 1/8 gas F.

N.B. RF can be supplied with the manometer assembled, RP/M can be supplied without manometer.

## GENERAL FEATURES

Thanks to the multi-possibilities to adjust both the air's flow and the material's quantity and pulverisation, the guns allows the user to obtain a wide range of orange peel surface of different features. In this way the user has the possibility to recreate the surface as it was in the beginning.

The tank's capacity, which is under pressure, it allows to the gun to work both with loose products and using the standard cans on sale in commerce of 1 kg. It can be directly screwed on the cover's threaded coupling.

The underpressure tank guarantees that during the work's breaks the material could be left inside the tank and it will not undergo any deterioration.

Application	Application and spray of protective and soundproofing materials both solvent-based and water-based.
Body	Drop- forged brass nickel plated.
Tank	In aluminium with protective treatment with high hardness and strength to the corrosion.
Cover	Realised in aluminium with integrated coupling, which has been threaded to allow the screw of the suitable cans, with high hardness and strength to the corrosion.
Needle	Stainless steel.
Nozzle and cap	Chuck brass prolonged nozzle and cap.
Pressure	Working pressure 2-4 bar / Maxium pressure allowed 8 bar.
Air consumpt.	Approxiamte 200-300 l / min

# BS 15

MADE IN ITALY

Coating guns

Professional gun for the application and spray of protective and soundproofing materials solvent based.  
The under pressure tank allows to this gun to works at very low pressure ( 2 - 3 bars) which avoid the formation of the spraying fog; furthermore it can be used besides standard products also with products that have high solid content so therefore with a little percentage of solvent inside that allows in this way to not pollute the work's environment.

## BS 15 USA

This gun has the same features of the BS 15.  
The American version changes from the BS15 for the tank and cover fitted for products contained in cans of 1/4 gallon according to the American standards.

## BS 15 AND BS 15 USA FEATURES

Application	Application and spray of protective and soundproofing materials solvent based.
Pressure	Working pressure 2-4 bar / Maximum pressure allowed 8 bar.
Air consumpt.	Approximate 200-300 l / min
Fitting	1/4 gas male
Noise level	<80 dBA
Gun's weight	1680 g
Single package	in neutral carton box 400x240x110 mm
Single package	305 g

42x49x61 cm. 10 pezzi 21 Kg.

# BS 15 WBS

The gun BS 15 WBS is the evolution of the BS 15, as a matter of fact it has been developed for the application of protective and soundproofing materials water-based materials of last generation.

The gun is equipped with a special flow regulator with safety valve integrated, which optimise the pressure inside the tank , so it guarantees the maximum flexibility of adjustment during the application of the product . At the same time this allows to let come out the pressure in excess inside the tank, to guarantee a perfect adjustment of the product also for very thin spray .

## BS 15 WBS USA

This gun has the same features of the BS 15 WBS.

The American version changes from the BS15 WBS for the tank and cover fitted for products contained in cans of 1/4

## BS 15 WBS AND BS 15 WBS USA FEATURES

Application	Application and spray of protective and soundproofing materials water-based.
Special feature:	Special flow regulator with integrated safety valve for the adjustment of the pressure inside the tank.
Pressure	Working pressure 2-4 bar / Maximum pressure allowed 8 bar.
Air consumpt.	Approximate 200-300 l / min
Fitting	1/4 gas male
Noise level	<80 dBA
Gun's weight	1707 g.
Single package	In neutral carton box 400x240x110 mm
Single package weight	305 g.

# ACCESSORIES FOR BS 15 SERIES

MADE IN ITALY

Coating guns

## KIT BS

*It allows to use all the BS 15 guns also for the application of protective waxes in the difficult parts to reach.*

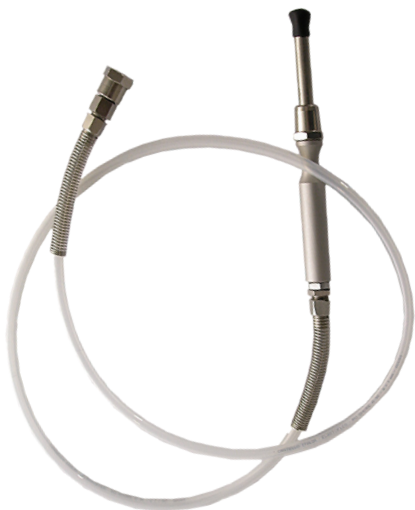

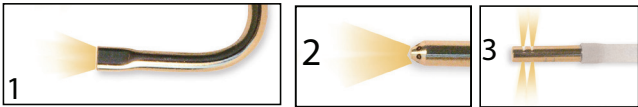

Application	For waxes (BS 15 - BS 15 WBS)
Extensions	1 - with nozzle 90° 2 - with anterior straight nozzle rose-pattern spray 3 - with straight nozzle 360° spray
Lenght	1500 mm
Tube Ø	6 mm
Single package	in plastic bag

## KIT BS FC

*The KIT BS FC allows to use all the BS 15 guns also for the application in teh difficult parts to reach, with fast automatic fitting.*

Application	For waxes (BS 15 - BS 15 WBS - WAX II)
Extension	1 - with nozzle 90° 2 - with anterior straight nozzle rose-pattern spray 3 - with straight nozzle 360° spray
Lenght	1500 mm
Tube Ø	6 mm
Single package	in plastic bag

## BS PROLUNGA

*Special extension to spray in the difficult patrts to reach, it has to be screwed directly in the place of the gun's cap.*

Application	For underbody coating material
Lenght	1300 mm
Tube Ø	10 mm
Single package	in plastic bag

# RA 1 SERIES

*This series of spray guns for applying sound deadners, bituminous, protective, antishock and soundproofing liquid materials is characterised by the excellent quality/price ratio and user friendly.*

## GENERAL FEATURES

*Thanks to the nozzles, whose the gun is equipped and to the possibility of adjusting them to the nearest millimetre, we are able to obtain perfectly delineated spraying finishes which may or not may smooth, thus managing to produce perfectly the treated part as it was in originally, observing the technical-visual features required by the treated part.*

Application	Liquid products
Body	Die- cast aluminium and zamak
Pressure	Working pressure 3-6 bar/ maximum working pressure allowed 8 bar
Air consumpt.	Approximate 200-300 l/min
Fitting	1/4" gas male
Noise level	<80 dBA

# RA 1

*Spray gun for applying sound deadners, bituminous, protective, antishock and soundproofing liquid products contained in standard disposable cans on sale in commerce from 1 - 2 kg which have to be applied directly onto the threaded bottom of the gun.*

*The RA 1 does not require any particular maintenance and if it is not used for a short period of time the can's product may be left attached to the gun.*

## RA 1 USA

*This gun has the same features of the RA 1 .*

*The American version changes from the RA 1 for the suction tube and cover fitted for products contained in cans of 1/4 gallon according to the American standards.*

## RA 1 AND RA 1 USA FEATURES

Application	For liquid products
Body	Die-casting zamak
Pressure	Working pressure 3-6 bar/ maximum pressure allowed 8 bar
Air consumpt.	Approximate 200-300 l/min
Fitting	1/4" gas male
Noise level	<80 dBA
Gun's weight	420 g . RA 1 - 381 g. RA 1 USA
Single package	in plastic bag 300x 350 mm with Eurolochung
Single package weight	5 g.

# RA 1 T

*The RA 1 T has been developed for the application of sound deadners, bituminous, protective, antishock and soundproofing liquid products to pour directly in its aluminium tank.*

*This gun is an efficient option to the BS 15, characterised by the excellent quality/price ratio and user friendly.*

*The RA 1 T does not require any particular maintenance and if it is not used for a short period of time the product can be left inside the tank.*

Application	Liquid products
Body	Die-casting zamak and brass nickel plated
Tank	1000 ml in aluminium
Pressure	Working pressure 3-6 bar/ maximum pressure allowed 8 bar
Air consumpt.	Approximate 200-300 l/min
Fitting	1/4" gas male
Noise level	<80 dBA
Gun's weight	840 g
Single package	In neutral carton box 125x330x220 mm

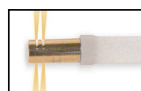

## ACCESSORIES RA AND CS R 2 SERIES

### RA 1 PROLUNGA

*It allows to use the RA 1 and CS R 2 guns also for the application of protective waxes in the box -type and in the difficult parts to reach.*

Application	For waxes (RA 1 - CS R 2)
Length	500 mm
Nozzle	Special spray nozzle 360°
Tube Ø	10 mm
Single package	In plastic bag

*The CS R 2 is the evolution of teh RA 1 and it can be used for application of sound deadners, bituminous, protective, antishock and soundproofing liquid products both solvent and water-based contained in standard disposable cans on sale in commerce from 1 - 2 kg with special thread 42x3 mm.*

*Developped for the professional use, the gun is equipped with an ergonomic handgrip , which increase the confort of the user during the use.*

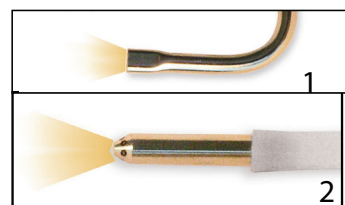

*Thanks to the nozzles, whose the gun is equipped and to the possibility of adjusting them to the nearest millimetre , we are able to obtain perfectly delineated spraying finishes which may or not may smooth , thus managing to produce perfectly the treated part as it was in originally, observing the technical-visual features required by the treated part.*

Application	For protective and soundproofing materials both solvent and water-based
Body	Die -casting zamak
Pressure	Working pressure 3-6 bar/ maximum working pressure allowed 8 bar
Air Consumpt.	Approxiamte 200-300 l/min
Fitting	1/4" gas male
Noise level	<80 dBA
Gun's weight	662 g.
Single package	In neutral carton box 260x55x295 mm
Single package weight	120 g

## WAX 2

EXTENSIONS

NOZZLE

**NOZZLE+ EXTENSIONS 11 and 2 of KIT BS FC**

already included in the box of the gun.

Professional gun for the application and the spray of the loose protective waxes, furthermore thanks to the extensions it can be used also for the application of them in the difficult parts to reach as box-type. This gun is equipped with an air's adjustment handwheel for the product's pulverisation and a handwheel for the adjustment of the product, the gun is suitable for the application of the protective waxes.

The gun has a tightness lockup tank that prevents the material from hardening during unused time or work's breaks. Furthermore on the tank's cover there is a safety valve, which allows the release of the pressure inside the tank, in this way it guarantees the safety of the user while unscrewing the tank.

Application	Loose protective waxes
Body	Highquality drop -forged brass nickel - plated body
Tank	1000 ml
Pressure	Working pressure 2-3 bar/ maximum working pressure allowed 6 bar
Air consumpt.	Approxiamte 200 l / min
Fitting	¼" gas male
Noise level	<80 dBA
Special feature	Safety valve to 6 bar
Gun's weight	1088 g.
Single package	In neutral carton box 400x240x110 mm
Single package weight	305 g.

Private Label is a CUSTOMIZATION SERVICE of the product, that P.M.T. provides to its customers. It is possible, upon request, to customize the applicators on the basis of your Brand by applying your logo, the name and the description of the item. Many P.M.T. customers take advantage of our customization service for their products.

Coating gu

## LOGO

Thanks to the Private Label service, you will be able to have on both plastic and metal components a laser marking or a pad printing with your corporate Logo. As an alternative, we can customize the products with labels with printed Logo.

## COLOR

By maintaining the style of your Brand, we manufacture the components in the color you desire. For example, we can personalize the handgrip or the metal parts, for which we employ special treatments such as the anodization and specific painting. We also select the best collaborators in order to grant you a unique and attractive product.

## PACKAGING

Our Private Label service can be realized also for the packaging. Customers may require personalized boxes or labels in color or in black and white.

1. PVC BAG, WITH GENERIC LABEL
2. PVC BAG, WITH CUSTOMIZED LABEL
3. NEUTRAL PACKAGING, WITH GENERIC LABEL
4. NEUTRAL PACKAGING, WITH CUSTOMIZED LABEL
5. CUSTOMIZED PACKAGING, WITH P.M.T. LAYOUT
6. CUSTOMIZED PACKAGING, WITH LAYOUT **WITH YOUR LOGO**

**P.M.T. s.r.l.**
